

Improve the efficiency of Oil & Gas heating equipment with CC-4 and CC-9

CC-4 and CC-9 can:

- ✓ **Produce more heat from the same amount of fuel**
- ✓ **Reduce heating costs** (Customers typically report fuel savings of 5 to 15%, often more)
- ✓ **Reduce harmful emissions**

Suitable for use on all types of domestic, and commercial gas/oil heaters, cookers, boilers, ovens etc
Works on Oil, Natural Gas, and LPG.

For commercial applications please enquire.

CC-4

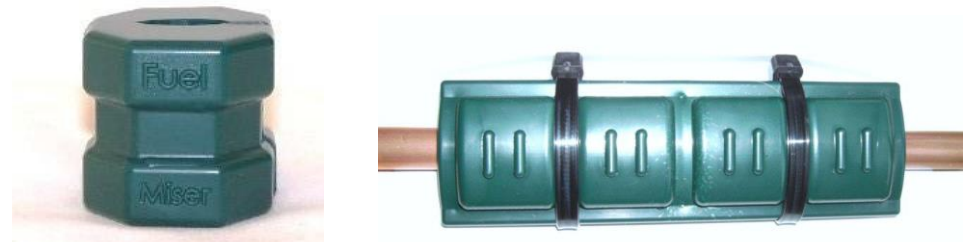

CC-10

Improve the efficiency of petrol and diesel engines with CC-1 and CC-8

CC-1 and CC-8 can:

- ✓ **Increase power and improve Torque**
- ✓ **Reduce fuel consumption** (Customers typically report fuel savings of 5 to 15%, often more)
- ✓ **Reduce harmful emissions**
- ✓ **Maintain a smoother and cleaner engine**

Suitable for use on all types of engines, and all types of applications: Cars and Vans, Lorries, Motorbikes, Scooters, Quad bikes, Mowers, Strimmers, Chainsaws, Boats, Ships, Bulldozers, Cranes, Compressors, Generators, Tractors etc

CC-1

CC-8

Simple to install - no need to cut existing pipework - transferable - no moving parts - no power required - no maintenance

Reduce limescale naturally with CC-8 and CC-10

CC-10 fitted to WATER SYSTEMS can

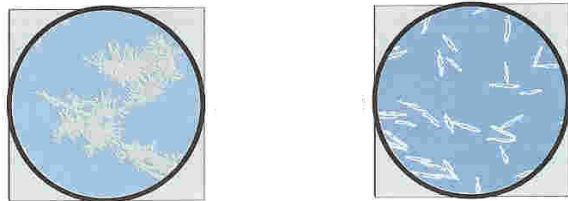

- ☑ Inhibit limescale
- ☑ Remove existing scale
- ☑ Reduce heating costs
- ☑ Extend the life of plumbing & appliances
- ☑ Keep shower heads clean
- ☑ Keep sinks and bath surfaces clean

How does it work on water?

Untreated hard water (left) containing CaCO_3 . The crystals form in large clumps in plumbing and equipment, forming a dense insulating material that reduces efficiency and is costly to control or remove.

In water treated by the unit (right) the Crystals do not adhere to plumbing or equipment and pass harmlessly through.

Samples of untreated water (left) and water treated by magnetic conditioning (right), allowed to evaporate and magnified 900x

Magnetic Conditioners are also fitted to the water circulation systems in swimming pools and fish farms etc to maintain the pH levels, reducing the need for expensive and environmentally harmful chemical treatment.

All products - 10 year guarantee on magnetic properties
10 year parts & labour guarantee

Fuel Savers for home and industry

CC-1 and CC-8

For petrol and diesel engines - can reduce fuel consumption and the levels of harmful emissions.

CC-4, CC-6 and CC-9

For gas and oil heating equipment - can reduce fuel consumption and the levels of harmful emissions.

CC-10, CC-6 and HD-C

For water treatment – can reduce limescale, improve CH/HW heating systems, and save fuel.
